# 1120

The Tally Dascom 1120 is a 18 pin serial dot matrix printer with USB interfaces as standard. Compact in size, the 1120 is perfect for industrial environments and front and back office applications where space is limited. With low running costs, high quality output and an easy to use control panel it's ideal for small business, low volume listings and reports, as well as dispatch notes and labels.

In addition to these applications, the 1120 is also well suited to measurement and control systems. Amongst the lowest priced matrix printers available today the 1120 also offers an easy to exchange ribbon. For draft printing it's considerably less expensive running costs make it a viable alternative to low cost ink-jet printers.
